

Detachable Lightweight Front Guard for Mini-Excavator class

AMAJYU SHEED®

Amajyu "SHEED" are designed to give operators the peace of mind that their cabin is protected from unforeseen impacts that may encounter on challenging construction and demolition job site. Designed to fit most mini-excavators in the 3-5 ton class excavators. This add-on attachment installs in about 5 minutes without special tools or modification to the cab.

- 1: SHEED can be added on many 3-5 ton class mini-excavators.
- 2: SHEED weighs 10 kg(22 lbs). It can be put on and taken off by one person in about 5 minutes. See back for installation instructions.
- 3: SHEED panels are made of polycarbonate material and can be easily replaced.
- 4: SHEED panels are available in color type to protect eyes and mesh guard types.
- 5: SHEED is an Amajyu original product. Amajyu can offer it at a low price.

Detachable Lightweight Front Guard for Mini-Excavator class

AMAJYU SHEED®

Installation Procedure

1: When detaching, use the main H-shaped frame and clips.

2: Fit the polycarbonate panel onto each bolt.

3: Fix the polycarbonate panel with a tool. Do not overtighten. The panel will crack.

4: It can be replaced with a colored type that protects the eyes.

5: Can be used in combination with the mesh guard types.

6: When you don't need the polycarbonate panel, you can easily remove it.
